[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Open to Remote / Onsite / Hybrid

PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with hands-on experience building scalable web applications using React.js, Node.js, and PostgreSQL. ECE graduate with a unique edge in hardware-software integration, validated through research at ISRO. Proven ability to reduce production bugs by 45% and accelerate development cycles by 25%. Eager to contribute to innovative teams in remote, onsite, or hybrid environments.

EXPERIENCE

Full Stack Engineer

Nov 2025 – Present

Ziga Infotech

- Developed and maintained full-stack web applications using Node.js, Express.js, PostgreSQL, and React.js.
- Implemented secure authentication, authorization, and data handling practices across production modules.
- Reduced production bugs by 45% through systematic debugging and code quality improvements.
- Accelerated development cycle speed by 25% using reusable components and modular coding practices.
- Built real-world modules including asset management systems, survey platforms, and data-driven dashboards.
- Collaborated on feature planning, testing, and deployment; adhered to Git-based version control workflows.

Research Intern

July 2024 – Oct 2024

Indian Space Research Organization (ISRO – SAC)

- Simulated a Fine Pointing System using FSM and Quad Detector for the PAT subsystem in an optical ground station.
- Analyzed Gaussian laser spot behavior and computed positional deviation from quad detector center using MATLAB.
- Compared centroid algorithms (sum-difference, diagonal, difference-over-sum) in Simulink and identified the optimal algorithm using Excel visualization.

PROJECTS

Asset Management System

Full Stack Web Application

- Built an asset tracking app using Node.js, Express, PostgreSQL, and Sequelize ORM.
- Designed Employee, Asset, and Asset Category masters with add/edit/view and search/filter functionality.
- Implemented asset lifecycle features: issue, return, scrap, and complete history tracking.
- Created a stock dashboard with branch-wise totals and overall asset valuation logic.
- Built responsive UI using Jade, Bootstrap, CSS, and DataTables.net.

Survey Management System

Node.js, Express.js, PostgreSQL, React.js, Sequelize ORM, RESTful APIs

- Built a full-stack Survey Management System enabling dynamic survey creation with question piping, conditional logic, and response validation using Node.js, Express.js, and PostgreSQL.
- Designed RESTful APIs for survey lifecycle management including launch settings, quota management, branding, redirects, and closing rules ensured data integrity across multiple concurrent survey flows.
- Engineered a dynamic React.js frontend with real-time question rendering, search/filter functionality, responsive UI and optimized complex piping logic and variable handling to resolve critical edge cases.

- Implemented efficient database operations using Sequelize ORM for scalable data storage, retrieval, and consistency across all survey workflows.

TECHNICAL & SOFT SKILLS

Languages: C, C++, Python, JavaScript, TypeScript

Frontend: React.js, HTML/CSS, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Sequelize ORM, Prisma

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Docker, Postman, Power BI, MATLAB, Simulink

Spoken: English, Tamil, Hindi, Marathi

EDUCATION

B.E. in Electronics and Communication Engineering

Oct 2021 – Apr 2025

K.S.R. College of Engineering

- GPA: 8.6 / 10

Higher Secondary (Class XII)

Jun 2019 – Mar 2021

Government Higher Secondary School, Kozhikkalnatham

- Score: 87.67%

CERTIFICATIONS & TRAINING

- Power BI – Advanced Level Training, I-BACUS TECH (Industry Collaboration)
- Cloud Computing – Speaker/Presenter, Karpagam College of Engineering
- Electric & Hybrid Vehicles – Attendee, IIT Madras
- Artificial Intelligence with Machine Learning – Attendee, IISc Bangalore
